EXIDE TECHNOLOGIES A400 FT BATTERIES

Dear Sirs

We confirm that, since 1998, we have been using Sonnenschein A400 batteries with our Optical Network Units (ONU) Fastlink installations.

On our Fastlink outdoor cabinets we have used up to 4 strings 48 V the A412/48 Ah 19" batteries, to provide 8 – 12 hours backup time.

Currently 9.938 blocs of Sonnenschein A400 FT batteries are installed in over 850 Siemens ONU cabinets in Poland.

We are pleased to confirm that, we have been always satisfied with Sonnenschein batteries and ETC service.

Yours faithfully

Siemens Sp. z o.o.
